

Military Nonstandard Fixed Bridging

Contents

	Page
PREFACE.....	vii
PART ONE BASIC CONSIDERATIONS	
Chapter 1 BACKGROUND INFORMATION	1-1
General Concepts	1-2
Bridge Design	1-4
Army Facilities Components System	1-4
Classification Information.....	1-5
Engineer Responsibilities.....	1-6
Supporting Information.....	1-6
Chapter 2 RECONNAISSANCE AND PRELIMINARY INVESTIGATIONS.....	2-1
Hasty Reconnaissance	2-1
Deliberate Reconnaissance	2-1
Repair or Reconstruction	2-1
New-Bridge Construction	2-2
Site Requirements	2-3
Survey Control	2-6
Survey Drawings.....	2-6
PART TWO CLASSIFICATION, REINFORCEMENT AND REPAIR, AND POSTING	
Chapter 3 CLASSIFICATION.....	3-1
Section I - Bridge-Classification Considerations.....	3-2
Section II - Expedient Classification	3-2

DISTRIBUTION RESTRICTION: Approved for public release; distribution is unlimited.

*This publication supersedes FM 5-446, 3 June 1991..

	Page
Hasty Method	3-2
Track Commander’s Bridge-Crossing Booklet	3-3
Section III - Correlation-Curve Classification	3-3
Correlation-Curve Applications.....	3-8
Bridge Condition.....	3-8
Span Length.....	3-8
Correlation-Curve Uses.....	3-9
Section IV - Analytical Bridge Classification	3-10
Classification Assumptions.....	3-10
Moment Classification for Simple Spans.....	3-15
Moment Classification for Continuous Spans.....	3-16
Roadway-Width Classification and Clearance Restrictions.....	3-18
Solid-Sawn and Glue-Laminated Timber-Stringer Bridges	3-18
Steel-Stringer Bridges	3-22
Composite-Stringer Bridges	3-26
Steel-Girder Bridges.....	3-29
Truss Bridges	3-46
Reinforced Concrete Slab Bridges	3-55
Reinforced Concrete T-Beam Bridges	3-59
Reinforced Concrete Box-Girder Bridges.....	3-64
Prestressed Concrete Bridges	3-65
Arch Bridges.....	3-74
Movable Bridges.....	3-81
Suspension Bridges	3-82
Other Bridges	3-83
Chapter 4 REINFORCEMENT AND REPAIR.....	4-1
Basic Considerations.....	4-1
Hasty or Emergency Repairs	4-4
Stringer Supports	4-7
Stringer Reinforcement	4-9
Steel Floor-Beam Reinforcement.....	4-11
Truss Reinforcement and Repair	4-11
Flooring Repair.....	4-17
Masonry-Pier and -Abutment Repair.....	4-18
Masonry-Arch-Bridge Repair.....	4-20
Chapter 5 POSTING	5-1
Bridge-Classification Signs.....	5-1
Traffic Controls.....	5-5

PART THREE DESIGN

Chapter 6	BRIDGE SUPERSTRUCTURES	6-1
	Design Phases.....	6-1
	Design Sequence.....	6-1
Chapter 7	SUBSTRUCTURE DESIGN	7-1
	Abutment Design Procedure.....	7-1
	Abutment Designs.....	7-12
	Intermediate-Support Design.....	7-34
Chapter 8	SUSPENSION-BRIDGE DESIGN	8-1
	Descriptions.....	8-1
	Bridge Sites.....	8-2
	Design Factors.....	8-3
	Live Load.....	8-4
	Panels.....	8-4
	Suspenders.....	8-8
	Main Cables.....	8-9
	Backstays.....	8-13
	Towers.....	8-13
	Anchorage.....	8-16
Chapter 9	CONNECTIONS	9-1
	Timber Connections.....	9-1
	Steel Connections.....	9-9
Chapter 10	CONSTRUCTION	10-1
	Planning Process.....	10-1
	Material Preparation, Timber Framing.....	10-9
	Material Preparation, Steel Fabrication.....	10-9
	Safety.....	10-11
	Erection-Equipment Capacity.....	10-12
	Special Equipment.....	10-13
	Truck- and Crawler-Mounted Cranes.....	10-13
	Derricks.....	10-14
	Cableways.....	10-14
	Hoists.....	10-14
	Jacks.....	10-14
	Falsework.....	10-15
	Erection-Equipment Techniques.....	10-15

	Page
Derrick Elevation	10-19
Special Launching Methods (Steel Erection)	10-22
Precautions	10-27
Suspension-Bridge Construction	10-29
Chapter 11 INSPECTION AND MAINTENANCE	11-1
Inspection	11-1
Maintenance	11-5
Chapter 12 BRIDGING IN ARCTIC AND SUBARCTIC ENVIRONMENTS	12-1
Permafrost	12-1
Transportation	12-2
Thaw Effects	12-3
Explosives	12-3
Steel	12-4
Wood	12-4
Concrete	12-4
Engineer Equipment	12-4
Construction Schedules	12-4
Bridge Foundations and Substructures	12-4
Native Materials	12-6
Foundation Survey	12-7
Intermediate Supports	12-8
Abutments	12-10
Ice Removal	12-12
Superstructure Principles	12-14
Panel-Truss Bridges	12-14
Timber-Truss Bridges	12-14
Steel-Truss Bridges	12-14
Fords	12-14
Ice Crossings	12-16
Expedient Ice-Bridge Construction	12-18
Expedient Ice-Bridge Reinforcement and Repair	12-19
Appendix A CONVERSION CHARTS	A-1
Appendix B VEHICLE CLASSIFICATION	B-1
Hypothetical Vehicles	B-1
Standard Classification Curves	B-14
Analytical Classification Procedure	B-14

	Page
Expedient Classification Procedure	B-20
Vehicle-Classification Signs.....	B-20
Appendix C TIMBER PROPERTIES	C-1
Civilian-Design Stress.....	C-1
Military-Design Stress	C-1
Appendix D STEEL PROPERTIES	D-1
All-Purpose Steel	D-1
High-Strength, Low-Alloy Steel.....	D-1
Quench- and Tempered-Alloy Steel.....	D-1
Steel Strengths	D-2
Structural Shapes	D-2
Unlisted-Beams Section Properties	D-12
Appendix E STRUCTURAL MECHANICS.....	E-1
Dead, Live, and Impact Loads	E-1
Stresses	E-1
Static Equilibrium	E-6
Internal Reactions	E-8
Shear and Moment Diagrams.....	E-10
Appendix F CLASSIFICATION EXAMPLES	F-1
Notations.....	F-1
Timber-Stringer Bridge.....	F-4
Steel-Stringer Bridge.....	F-8
Composite Steel-Concrete Stringer Bridge.....	F-11
Steel-Girder Bridge	F-17
Truss Bridge.....	F-24
Reinforced Concrete-Slab Bridge	F-31
Reinforced Concrete T-Beam Bridge.....	F-35
Reinforced Concrete-Box-Girder Bridge	F-39
Prestressed Concrete Bridge.....	F-43
Masonry-Arch Bridge	F-48
Appendix G CONCRETE PROPERTIES.....	G-1
General Properties.....	G-1
Cement Types.....	G-2
Mass-Concrete Structures	G-4
Steel-Reinforced Concrete.....	G-4

	Page
Appendix H	
SOIL PROPERTIES	H-1
Appendix I	
SUPERSTRUCTURE DESIGN EXAMPLES	I-1
Notations	I-1
Timber-Stringer Superstructure with a Timber Deck	I-3
Steel-Stringer Superstructure with a Concrete Deck.....	I-9
Glossary	Glossary-1
Bibliography	Bibliography-1
Index	Index-1
